

DIGITAL TELEPHONE INTERCONNECT

TURBOTACT™, the Telephone Access Control Terminal, interconnects a MOTOTRBO™ two-way radio system to an IP telephone system, an ordinary telephone line, or PABX extension. It allows you to make and receive telephone calls on your MOTOTRBO™ Motorola professional digital two-way radio mobiles and hand-helds. Other features include alarm dialer and relay control functions, and analogue mode for fleets in the analogue – digital migration stage.

FEATURES

- Introducing TURBOTACT - the most powerful, yet simple to use telephone interconnect ever made.
- All call, group call and private call capable
- Half duplex – radio user has full voice path control using Tx Interrupt
- Talk to any telephone in the world
- Last number redial
- 100 speed dial numbers
- Automatic disconnect
- Record output for recording radio-telephone calls
- Alarm dialer and controllable relay outputs
- Analogue mode for fleets still using analogue transmission
